# LEADER OF THE ENERGY REVOLUTION IN THE DRC

# 42 YEARS OF EXCELLENCE

Founded in Goma in 1980 by Dominique Otjacques, GoShop (formerly Trameco) originally specialized in electromechanical services. Over the years, the family business decided to invest almost entirely in the energy sector by distributing renowned brands of diesel generators (Perkins) as well as solar products and solutions (Victron Energy, BYD, Fronius, and many others).

03

# YOUR ENERGY PROVIDER

For four decades, GoShop has positioned itself as a leader in energy autonomy and efficiency in the Democratic Republic of Congo. The company, which has more than 150 professional technicians, continues to innovate by offering its customers a wide range of energy solutions that meet a wide variety of needs and fields of application: Solar mini-grids providing electricity, drinking water and internet (Pay as you go); solar street lights, solar water pumps, hydroelectric applications, etc.

More than just a distributor, we are above all a system integrator of autonomous energy solutions. We supply both companies with high energy requirements and individuals looking for simple and sustainable solutions for their homes in cities or remote areas.

## Unique expertise in the DRC

Are you looking for green energy systems - solar, hydroelectric - or thermal generators? GoShop has the solution to your needs and will assist you in all your projects in the Democratic Republic of Congo but also in East Africa (Rwanda, Burundi, Uganda, South Sudan, Central African Republic, Congo Brazzaville).

Our experts respond to your requests, make diagnosis, carry out technical studies, size, install and maintain the technical installations in order to meet your needs as quickly as possible.

Our technicians are trained in GoShop in collaboration with our suppliers. We also organize technical training several times a year in our stores and will launch the GoShop academy in Goma in 2022 to continue to provide a qualified workforce and grow the renewable energy sector.

GoShop has always sought the satisfaction of its customers by offering quality service, high-end, durable and efficient products, and an after-sales service that ensures compliance with supplier guarantees.

# PROMISES

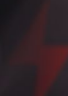

To offer you the best service and develop **long-term** relationships with you.

Provide you with high-performance, **quality equipment at the right price.**

Meet your needs and offer you solutions adapted according to our **expertise.**

Contribute to the development of the DRC by providing **clean and renewable energy.**
